Project Highlights

US Department of Defense—Fort Monmouth

Acquisition Support

BANC3 is providing acquisition support services to Fort Monmouth's Communications-Electronics Life Cycle Management Command (C-E LCMC) Rapid Response (CR2) Project Office. The CR2 Office provides a unique service that aids all US federal government managers in the execution of their mission objectives. By directing a unique, competitive, and streamlined business process, the CR2 Office allows managers to acquire contractor-provided equipment and services effectively. BANC3's services include:

- Pre-Award Acquisition Support
- Pre-Award Engineering and Technical Support
- Acquisition Security Support
- Acquisition Budget Support
- Facilities Maintenance Oversight
- Post-Award Administrative Support

Integrated Database Environment

BANC3 is assisting in the development, integration, enhancement, implementation and support of the CR2 Project Office's Integrated Data Environment. The migration from a legacy system to new Web-enabled system will reduce processing time. To accomplish this, we are utilizing several technologies over multiple tasks, including:

- Development of a custom program with backend SQL database interacting with a front-end web user interface using Active Server Pages with Visual Basic script supported by a .NET framework/Sharepoint.
- Design of custom programs, including automatic email functionality, multiply file attachments, data entry screens, reports, automatic actions, and interaction with other SQL databases.
- Design of application partitioning (logical and physical).

Department of Defense—Navy Expeditionary Medical Support Command

BANC3's staff supports NEMSCOM by providing Primary desktop support for a network of approximately 150 users. Responsibilities include:

- Configuring and deploying new Windows 2000 workstations.
- Deploying new Windows security patches.
- Assisting the Network Engineer, Information Systems Security Manager, and Database Administrator with daily operations.
- Logging and responding to e-mail and telephone helpdesk requests.
- Ordering all department office supplies and Information Technology equipment.

The Port Authority of NY and NJ

The Port Authority of New York and New Jersey manages and maintains the bridges, tunnels, bus terminals, airports, PATH and seaport that are critical to the bistate region's trade and transportation capabilities. Under this contract, BANC3 is providing System and Database management and administration services for a three-year term contract from 2007 to 2009. We are utilizing the following technologies for this contract: Unix, Oracle, Citrix, SQL, IBM, Enterprise Server, and Microsoft Access. Our major projects include database and server replication using IBM Storage Manager, and the plan and update of the entire infrastructure/environment to Oracle 10gR2.

The Haddon Township (NJ) School

BANC3 is assisting the Haddon School District in restructuring its report card creation process to a Web Application/Relational Database. This new system would give teachers the ability to create their report cards via online connectivity that would then update content in their database and allow for report generation. Teachers log on securely to the Web database via SSL.
